Hanna Side & Window Brush

Hanna's Side & Window Brush is one of the most popular brush components in the industry. It provides superb cleaning coverage of the upper side, side and rocker panel areas of a vehicle. The 70' brush height is higher than other side brushes allowing for better cleaning of today's taller vehicles. Hanna's exclusive cloth cut also allows for a faster brush rotation and cleaning action. Tension against the vehicle is achieved by an adjustable shock and spring assembly. There is also an adjustable stop bracket to set the rest position.

Component Assembly

Angled Side & Window Brush

Hanna Angled Side & Window Brush

Hanna's Angled Side & Window Brush is similar to the Horizontal Side & Window Brush, only angled toward the vehicle to follow the contour of its surface. It uses a combination of gravity and a special dampening shock to provide proper brush penetration and safely clean hard to reach areas like the top of the vehicle's side windows. The 70" brush height in combination with the angled brush assembly allows better cleaning of the top side window area of sport utility vehicles and mini vans.
